DVConnect Womensline provides support to people **seeking an immediate pathway to safety from domestic and family violence.**

We will talk about your situation and help you create a plan to protect yourself and your family.

We can connect you with crisis accommodation and emergency transport.

DVConnect is a 24/7 free and confidential service. If you have experienced violence but are not currently at risk, your local domestic violence service can support you. **If you are actively experiencing violence, you should call 000.**
